

UiPath Task Capture

Duration: 2 hrs

We have published a new course to showcase how can you document and gather data on the business processes across your company.

This course covers the main concepts and capabilities of Task Capture and ensures that you will be able to start using it right away.

By the end of this course you should be able to:

- Describe the key features of UiPath Task Capture;
- Identify the prerequisites and how to install Task Capture;
- Use the two methods of creating process documentation in Task Capture;
- Differentiate between the scenarios in which Create Diagram or Capture Process should be used;
- Save and export your Task Capture projects;
- Customize Task Capture and the document templates to better serve your needs.
