Skill up for your job

The Academy experience is designed with a user-centric approach, delivering a high-quality learning journey. All the courses cover real-life automation scenarios, include RPA best practices, and provide hands-on training experience.

For Professional RPA Roles

Any successful RPA implementation starts with a self-sustaining and scalable automation expertise to run and maintain robots.

A Center of Excellence (CoE) is essentially the way to embed RPA deeply and effectively into the organization, and to redistribute accumulated knowledge and resources across future deployments.

Tailored learning plans for each CoE role are available on UiPath Academy.

For Business Users

We aim to support modern businesses by enabling every employee to use, create, and benefit from automation.

Join the citizen-led automation movement with our free learning plans for business users.

Get started with RPA and learn about the UiPath Platform

Learn how to discover, build, manage, run, engage and measure your automation today. Become an expert on a specific product—or the full UiPath Platform with us.
